OpenAI

Academic Product Tester (*Volunteer*) December 2021 - Present

- Granted early academic access to all new Open AI products for testing and research purposes. Examples of products I tested pre-launch include Chat-GPT, Dall-E 2, GPT-4, etc.
- Provide feedback and guidance to Open AI development team for future product development.

Burners Without Borders

Regional Co-Chair (*Volunteer*) February 2020 - Present

- Develop local disaster preparedness and response capacity.
- Fundraise and educate the public about how to contribute to resiliency and sustainability
- Build, manage, and educate the public about appropriate technology.

ClipperCreek

Summer Internship (*Full-time*) Summer 2021

- Developed comprehensive knowledge of electric vehicle charging infrastructure and products.
- Managed sales channels and scheduled order fulfillment based on manufacturing schedules across hundreds of product lines.

GRID Alternatives

Summer Internship (*Part-time, concurrent*) Summer 2021

- Trained and certified for installing home solar power and electric vehicle charging infrastructure.
- Learned to leverage these skills plus funding sources to provide free or affordable solar power infrastructure, electric vehicle charging infrastructure, and even electric vehicles for people in marginalized communities.

Tech 2U

Lead Software Engineer (*Full-time*) April 2013 - June 2017

- Led a team building a proprietary ERP/CRM database platform to manage the business.
- **Brought in over a million dollars a year in new revenue.**
- Developed integrated marketing automation tools, supply-chain management, inventory management tools, reports, audit automation tools, KPI dashboards, human resources tools, and payroll systems.
